

HEADING

Alpine rope course in Obertauern

SUBHEADING

Find your balance among the larch trees

SHORT TEXT

Step onto the next obstacle, find your balance and keep going: at the Alpine rope course in Obertauern, new challenges await, with a guide by your side and larch trees and mountain views all around.

TEXT

Between Felseralm and waterfall Johanneswasserfall, a high ropes course combines physical activity with time in nature. Concentration, coordination and confidence in your own steps are essential. After an introduction, you explore the course using the provided safety equipment and under supervision.

You can visit the course directly or combine it with a walk: it takes about 30 minutes to reach the Alpine rope course from the Grünwaldkopfbahn, or about 50 minutes from the Gnadenalm. Visits for families, individuals and groups can be arranged in advance. The Alpine rope course also features in the weekly summer programme on Thursdays.
