

HEADING

Snowbiking and snowkiting in Obertauern

SUBHEADING

Downhill on runners or across the snow with the wind

SHORT TEXT

Would you like to try something new in winter? Snowbiking lets you glide down the piste on two runners. Snowkiting uses a kite and the wind to propel you across the snow on skis or a snowboard.

TEXT

Snowbiking

A bike with runners instead of wheels offers a new way to experience the piste. An introductory lesson helps you get to know the equipment and practise your first descents. Skischule Koch also offers guided tours and a Moonlight-Tour, followed by a chance to warm up in a mountain hut.

Snowkiting

Here, the wind sets the pace: a kite pulls you across the snow on skis or a snowboard. At Obertauern's Snowkite-Area, the local snowkiting school helps you make your first attempts or improve your technique. Courses for different ability levels make it easier to get started in this distinctive winter sport.
